

TRINITY

Tracking Solutions

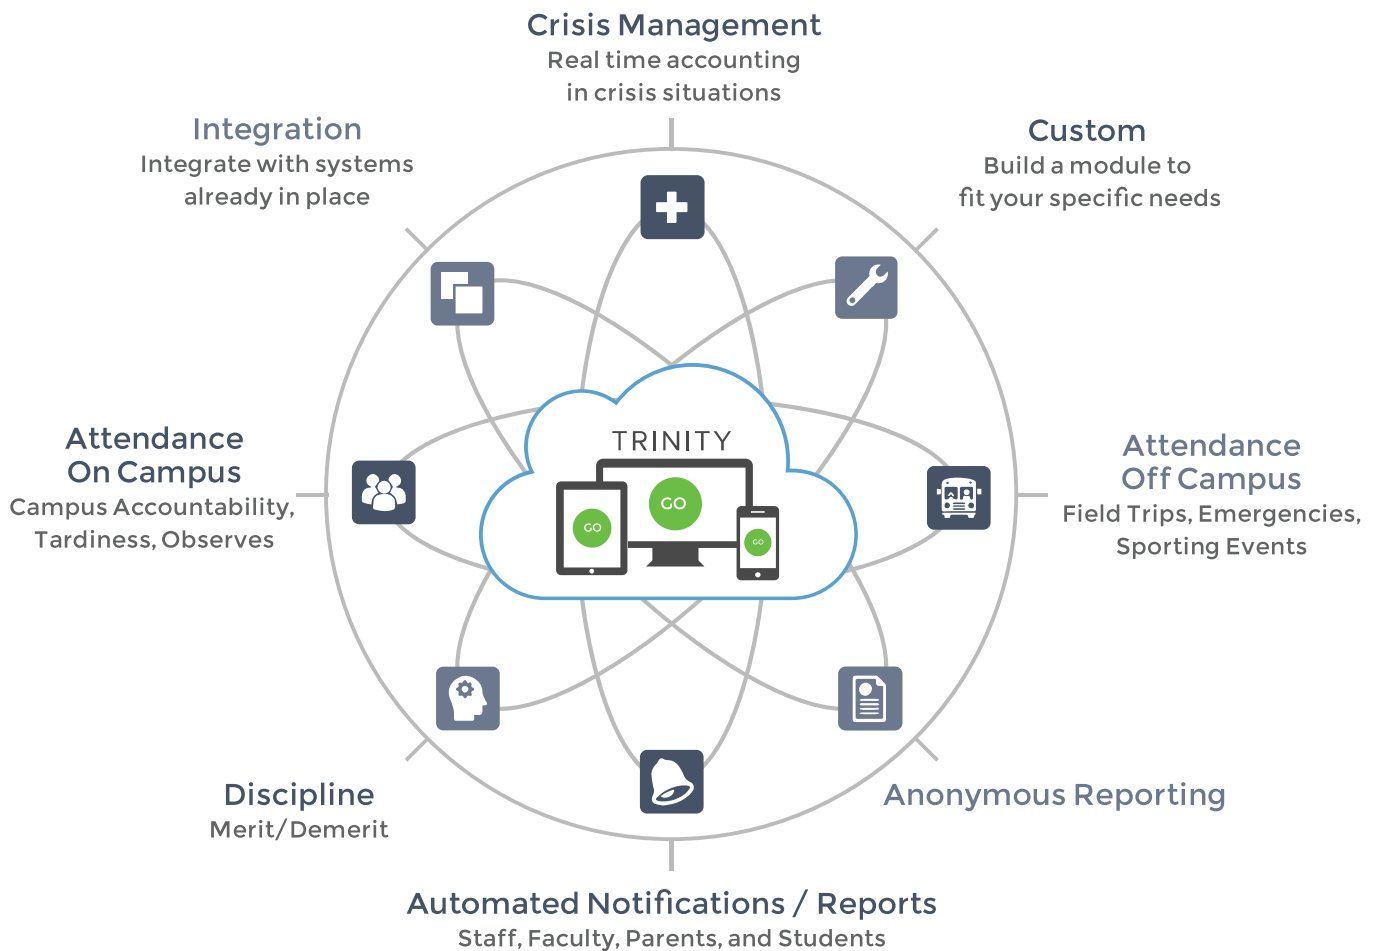

Crisis Management, Attendance, and Discipline all from a single Interface.

How do you manage school attendance, discipline, or an unexpected crisis on your school campus?

School communities need a software solution that adapts to the systems they already have in place and the ongoing safety needs of their school. One that not only helps them manage their students, but accounts for them and keeps them safe.

That's why schools rely on Trinity. Trinity is a customizable school management platform that has the ability to integrate with other school management systems. Trinity uses active and passive technology to manage school attendance, manage discipline, and prepares school staff and students to identify, confront, and resolve crisis situations.
